*“Fear outs when the Truth is out of alignment, and opinions prevail.”*

### Chapter 2: The Separation

I was born on the day after Good Friday. As the Sun set and the new Moon rose, invisible above the eastern horizon, a small head of thick dark hair crowned. At exactly 6.30 pm my tiny delicate body smeared with blood and white vernix, slid safely out into the big bright world.

Over two hundred babies are born every minute. Miraculously no two babies are born identical, including identical twins. Although early cell division may produce embryos that carry identical genetic material, pre-natal environmental influences ensure individuation, even before birth. Nature ensures that epigenetic factors create human beings who are unique because biodiversity is nature’s law. Biodiversity is the foundation of evolution. Survival of the fittest through dominance is a common misperception, survival is granted through adaptation. Through biodiversity, nature creates and differentiates. Nature doesn’t discriminate.

Despite being completely unique, there was nothing remarkable about my arrival. Except that I was born at a certain time on a particular day, at a specific location on planet Earth. Travelling at different speeds due to gravitational forces, the same alignment of the Moon, planets, and stars will not occur again for another 25,000 years. That is remarkable...
